ABOUT ME

Software Developer with a Computer Science degree and hands-on experience building production systems across Python, JavaScript, and cloud environments. Experienced in developing automated data pipelines, integrating third-party APIs, and debugging distributed systems in real-time. Strong communicator who bridges technical implementation with business requirements. Looking to contribute as a junior software engineer in a collaborative, growth-oriented team.

SKILLS

- **Languages:** Python, JavaScript, Java, C++, Go, C#, SQL, Bash
- **Frontend:** React Native, HTML/CSS, REST API consumption
- **Backend:** REST APIs, WebSocket integrations, data pipeline development, server-side debugging
- **Cloud & DevOps:** Azure (basic), Docker, CI/CD pipelines, Git/GitHub
- **Databases:** SQL, data modeling, structured data extraction
- **Tools:** Git, GitHub, logging & monitoring, Figma/FigJam, ElevenLabs API, OpenAI/Whisper
- **Practices:** Agile workflows, technical documentation, root cause analysis, code review
- **Communication:** Requirements gathering, stakeholder alignment, translating specs between technical and non-technical teams

WORK EXPERIENCE

- **Junior Developer – Modifia** *Remote*
August 2025 – February 2026
 - Built automated Python pipelines to process chat and call transcript data, transforming raw customer interactions into structured FAQ knowledge bases for conversational AI.
 - Integrated ElevenLabs text-to-speech API to generate natural-sounding voice outputs with custom voice configurations for client deployments.
 - Resolved integration issues across Python services and third-party APIs using systematic debugging and root cause analysis.
 - Implemented logging, configuration management, and monitoring to support system reliability and continuous improvement.
 - Defined escalation workflows and success metrics in collaboration with stakeholders.
- **AI Agent Developer Intern – Aatio Digital** *Saint John, NB*
Summer 2025
 - Debugged production voice agent systems, identifying failure points across STT, LLM, and TTS pipelines in real-time communication services.
 - Built and tested integrations using REST, WebSocket, and JSON APIs to enable reliable agent-to-service communication.

- Prototyped improvements to conversational logic, error handling, and agent state management.
- Produced technical documentation including architecture diagrams and CI/CD deployment procedures.

- **Business Analyst – Modifia**

Remote

February 2026 – Present

- Authored technical specifications for a cross-platform mobile app (React Native, iOS/Android) serving four user roles across multiple countries.
- Designed user flows and system architecture for 7+ modules including authentication, role-based access control, real-time chat, and media handling.
- Defined API contracts, data models, and media upload policies in collaboration with developers.
- Translated complex requirements into accessible documentation for non-technical clients and stakeholders.

- **Healthcare IT Process Improvement Consultant (Academic)**

Winter 2025

- Conducted requirements gathering and current-state process mapping for a healthcare IT system.
- Recommended a scalable digital solution supported by data analysis, feasibility assessment, and risk evaluation.

- **Help Desk Support Intern – Arzan**

Almaty, Kazakhstan

Summer 2018

- Provided first-line technical support, troubleshooting hardware, software, and network issues.
- Escalated and resolved complex issues in collaboration with senior IT staff.

EDUCATION & CERTIFICATIONS

- **University of New Brunswick**
Bachelor of Science in Computer Science
Minor: Business Administration
2021 – 2026

- Cloud Computing WIL Digital e-learning (ICTC)
- Get Started with Azure DevOps
- Introduction to Microsoft Copilot & AI Productivity Tools
- C# Programming and Unity
